
Closing phase-balanced policy: constraint values versus time (seed 25)
Nominal SAC
SAC + CBF
Safety boundary $h = 0$
Upper cone
Lower cone
Cone barrier h [m]
Finite axial bound
Axial-bound h [m]
Total port speed
Axial speed
Speed barrier h [m^2/s^2]
Positive attitude
Negative attitude
Attitude barrier h [deg]
Positive angular rate
Negative angular rate
Angular-rate barrier h [deg/s]
Time [s]
