Final-approach spatial trajectory — evaluation seed 125
Protected docking cone $|y_p| \le \kappa s$
Simulator corridor (±5 m)
Docking-distance target (0.1 m)
Unfiltered SAC (safety_violation)
Cone + speed CBF (success)
Full CBF (cone + speed + alignment) (success)
Lateral port displacement $y_p$ [m]
Along-axis port separation $s$ [m]
